

ALCOSCAN AL1100F

is a highly sensitive fuel cell installed alcohol screening device. Especially useful for fast checking a small quantity of alcohol component in the breathing gas of driver.

SPECIFICATIONS

1. Indication of B.A.C.
 - HIGH: > 0.60‰ or 0.06%BAC or 0.30mg/l BrAC
 - LOW: 0.30~0.60‰ or 0.03~0.06%BAC or 0.15~0.30mg/l BrAC
 - PASS: < 0.30‰ or 0.03%BAC or 0.15mg/l BrAC
2. Sensor: Fuel cell alcohol sensor
3. Accuracy: Above 80% alcohol detecting rate at 0.30‰ or 0.03%BAC or 0.15mg/l BrAC
4. Mouthpiece: No need to use
5. Power: Rechargeable lithium-ion battery pack
6. Weights: 140g (Including Batteries)
7. Dimension: 140 (height) X 56.6 (width) X 25 (thickness) mm
8. Warm up & Response time: 10 seconds / 5 seconds
9. Audible warnings: 3 steps beep warning of alcohol detection with LED display
10. Storage & Using temperature: -10℃ to 60℃ / -5℃ to 40℃
11. Manual sampling test: Available
12. Available color: Navy
13. Certificate: CE

Contents

- 1pc Breathalyzer
- 1pc DC7.5V/2.0A Power adapter
- 1pc Plastic case
- 1pc Car adapter
- 1pc Manual

Package

- 20pcs/Carton
- Size: 500 x 410 x 310(mm)
- Weight: 13kg

Manual sampling mode

- Manual sampling is drawn breath sample forcibly to analyze
- Usually used for unwilling for blow or breath sampling is not enough to analyze
- *This mode cannot be showing reliable result compare to automatic sampling mode

Accessories for AL1100F (Sold separately)

- Yellow rubber case: Including magnet so attachable to the car

- Anti bacterial film: Covering AL1100F sampling part for the hygienic purpose
